

Sink Options

When it comes to sinks, you can opt for acrylic solid surface, stainless steel, porcelain and more. You also have the options for how your sink is affixed to your countertop.

Drop-In

Drop-in or Top-mount sinks sit on top of the countertop. These work with any type of countertop material.

Integral

Integral or seamless sinks are made from the same material as the countertop. The countertop "flows" into the sink without a lip, overhang or crevice. There's no place for the dirt to hide, so cleanup is fast and easy.

Undermount

Undermount sinks are installed beneath the countertop and either have a small overhang or a negative reveal.
